

PANBUSTER

IMPROVE AERATION AND DRAINAGE WITH THE MARKET-LEADING, LOW HORSEPOWER, POWERFUL SUBSOILER.

The Panbuster is the ultimate low-disturbance subsoiler, designed to enhance soil aeration, drainage, and overall grass quality and yield. Every model features hydraulic depth adjustment on the move, setting it apart from the competition.

Well-aerated soil with a strong root structure significantly boosts grass yield potential. Improved aeration enhances drainage, while increased pore space allows moisture to penetrate quickly and promotes efficient water movement. This ensures better drainage in wet conditions and improved moisture retention during dry periods.

A properly aerated and drained soil with a solid structure maximizes root development, which in turn supports healthier plant growth. The advanced technology behind the Panbuster delivers the ultimate low-disturbance leg assembly, ensuring minimal surface disruption while effectively improving soil movement at deeper depths.

Model	3/4 Leg Shearbolt	3/4/5 Leg Shearbolt
HP	100hp	130hp
Number of Legs	3/4	3/4/5
Leg Spacing	36 in / 24 in	48 in / 32 in / 24 in
Working Width	7.87 ft	9.84 ft
Transport Width	7.87 ft	9.68 ft
Weight	2116 lb	2469 lb

Standard Features:

- Hydraulic roller/hydraulic depth control: The machine can be lifted out at the end of the run using the roller. The roller then runs over the exits for a clean finish.
- Inline legs maximize the lift. Toplink adjustment can be used to compensate for wear, extend life and reduce running costs.
- Reset trips up and back to minimize stress and prevent stones rising to the surface
- Spring loaded discs
