

LASER GRADER

REDUCE THE TIME REQUIRED FOR GROUNDS RECONSTRUCTION BY ABANDONING OLD TECHNOLOGY FOR NEW TECHNOLOGY.

With the STEC Custom Laser Graders your crews can significantly reduce the time required for grounds reconstruction. They will appreciate how well it operates in different and unique terrains. It has a system that automatically adjusts multiple times a second to make sure that it is working as smooth and as level as possible.

The STEC Laser Grader can be customized for leveling sports fields, golf courses or any area that require a consistent surface grade. The STEC Laser Grader can help you achieve a more efficient and accurate grade up to 1/4 of an inch. It's fully adjustable to compress or expand hydraulically on the fly to make working widths 5-8ft. The Laser Grader is equal to, or superior to any other method, and we have the right machine for your job no matter the size.
