

GKB COMBISEEDER

INNOVATIVE DIMPLE SEEDER THAT INCREASES SEED TO SOIL CONTACT AND SEED GERMINATION.

Are you looking for a fast and efficient way to seed or overseed your golf course or sports field? The Combiseeder offers both solutions, as well as the possibility to seed multiple types of grass.

It has two spiked rollers, that dimple the soil and accurately drops seed across the full width of the machine, with over 1,500 holes per square yard. Two adjustable brushes lightly sweep the seed into the newly formed dimples for maximum seed to soil contact.

The multifunctionality of the Combiseeder makes it the ideal machine for sports venues, golf courses, schools, local governments and contractors, among others. Despite its simple design, the machine offers the ability to greatly improve the presentation, playability and health of the surface in an easy way.
