

GKB SANDSPREADER

BUILT FOR THE CONSTRUCTION AND ONGOING MAINTENANCE OF SPORTS SURFACES AND GOLF COURSES.

The GKB Sandspreader applies a vast variety of materials across your surface, which is necessary during both field construction and maintenance. Topdressing allows efficient evaporation of excess water, oxygenation of the soil, and less organic matter build up on the top layer. With this machine you can save time, spread more product, and solidify healthy turf.

The shape and design of the hopper ensures an efficient operation and a clear view along the machine. The sand is transported to an adjustable metered gate along a wide, large capacity conveyor belt. The spreading discs are adjustable on multiple points, allowing the Sandspreader to provide perfect material distribution based on your wants and material you are using.

Model	SP100	SP230	SP300	SP400
Spread Width	6-33 ft	6-39 ft	6-39 ft	6-39 ft
Weight	700 kg / 1543 lbs empty	1080 kg / 2380 lbs empty	1480 kg / 3260 lbs empty	1520 kg / 3350 lbs empty
Bunker Capacity Flat Filled	35 ft ³	81 ft ³	106 ft ³	141 ft ³
Dimensions	126x59x55"	173x75x63"	203x75x73"	205x93x81"
Power Requirement	>20 hp	>30 hp	>40 hp	>60 hp

Standard Features:

- Sturdy wheelbase for perfect stability and weight dispersion
- Hopper is shaped for good visibility and efficient sand discharge
- Adjustable conveyor belt speed
- Double hydraulically driven, precisely adjustable spreading discs
- The hydraulic lockable valves
- Optional discharge belt, for example for filling sand bunkers
- Connected to your tractor with a drawbar and clevis
